

# MISCO. Amplifiers

MODEL #: MA-2104  
**2.2.1 CHANNEL, 50W, PCB STYLE AMPLIFIER WITH  
DSP**  
PART #: 93107

The MISCO 93107 is an ideal choice to power a subwoofer and two 2-way speakers, or a sub and two pair of high/midrange speakers. Potential applications include arcade gaming consoles and other uses where wide frequency and dynamic range are needed. Built-in digital signal processing provides a software adjustable crossover and EQ for easy sound optimization, and accepts a power supply input range of 9 to 24VDC, allowing for existing power rails or an external MISCO power supply [sold separately](#).

## Key Features

- 2.2.1 channel configuration
- Up to 70 Watts total power output\*
- Cool-running Class D amplifier
- Integrated DSP for maximum sound control parametric (EQ, Crossover and dynamic range software control)

\*Power output varies with supply voltage and speaker impedance. See specs table for details.

## Primary Specifications

<b>Amplifier Style</b>	Printed Circuit Board
<b>Amplifier Channels</b>	2.2.1
<b>Watts Per Channel (HF/LF) (W)</b>	14 x 4 / 34
<b>Digital Signal Processing</b>	Yes
<b>PSU Voltage Range</b>	24
<b>Audio Input</b>	Digital
